exe file is missing or something like that. A: As it says the exe file is missing, you will have to do one of the following: Download the steam\_api\_64.dll from the Steam website. (You'll find it on your game directory) Make sure that you have C++ redistributable installed, if you don't, you can install it here. Google is considering new hardware and services to compete with Apple's iMessage and Facebook Messenger. CEO Sundar Pichai recently told Re/code that Google is working on a new messaging product that may be ready for a 2018 release. Pichai said in the interview that "of course there is a messaging product in the works at Google." He continued, "We are constantly thinking about messaging. If you look at what we do in the search space, you can see the parallels. There are so many of these conversations that take place today over messaging and talking to people." Pichai said that Google is focused on the end-to-end experience, and whether users' communications are private and secure. "Our aim is to make a great messaging product for consumers," he said. "We see messaging as an important communications channel in the longer term, so we're not thinking about a short-term play." When asked if Google was working on building its own messaging network, he responded that Google is working with many partners, "but we're also thinking about building our own messaging platform." During a recent appearance at DLD Germany, Pichai acknowledged that Google's messaging experience was not perfect. "We do have a lot of work to do. We have a lot of work to do on our messaging product and on all our messaging products," he said. At the time, Pichai noted that Google had to maintain "a number of platforms and a number of teams." "For me it's just about thinking about how do we organize our teams, how do we allocate resources to give you best possible outcomes for what you want to do," Pichai said. Despite the challenges of scaling up Google's messaging products, Pichai reiterated his position that Google is "not going to be a social network." In a follow-up interview with CNET, Pichai reiterated that Google is not planning to create a social network but that the company is "building products that will enable people to do what they 82157476af"
